

• Campaign · AI-First Enterprise

June 2026 LinkedIn calendar.

Fifteen posts across four weeks taking the AI-First Enterprise narrative from data to outcomes — launch, agentic platforms, governance, activation.

Book an AI-First Readiness Assessment →

Primary CTA across all 15 posts.

The campaign in one frame.

The AI-First Enterprise: From Data to Outcomes — Xavor's organic LinkedIn play for June.

The narrative arc across four weeks.

TOPIC MIX

Topic mix.

Matches framework section 4. AI-first thesis dominates; agentic platforms split evenly across ServiceNow, Salesforce, Oracle.

READ

The umbrella thesis carries 4 posts. The platform stack carries 6. Governance and edge each carry 2.

All seven topic buckets ship in June. No bucket is back-burnered.

- Anchor
- Standard
- Single-post

FORMAT MIX

Format mix.

Six formats grouped into three families. Carousels and reels carry the load; video and article anchor.

DEVELOP Carousels 6 Carouslel4 Case Study2	PREVIEW Video 6 Explainer Reel4 Video Feature2 60-second explainers, longer-form features. The voice layer.	SHIP Long form 3 Article2 Static1 The anchor and the announcement. Used sparingly.
---	--	---

WEEKLY RULE Every week ships at least one carousel + one explainer reel. Static slot used once, in Week 3.
--

Launch the umbrella narrative.

Set the operating-model thesis: AI becomes the operating model when workflows, data, and decisions get redesigned around it. Anchored by a long-form article and a 4-layer carousel.

- 1 Article
- 1 Carousel
- 1 Explainer Reel
- 1 Video Feature

Set the thesis. Show the depth.

POST 01 · JUN 02

Article

The AI-First Growth Function: How Enterprises Move from Pilots to Production.

AI becomes the operating model when workflows, data, and decisions get redesigned around it — not when features get bolted onto old processes. The campaign anchor.

CEOs · CTOs · CMOs

DESTINATIONS

Every post lands on one of four destinations.

No "learn more" CTAs. Each post routes the reader into a concrete next step.

DESTINATION 01 · ANCHOR

Readiness Assessment

The campaign anchor. Bookings page. Post 2 is the direct driver; six others route here as secondary.

DRIVEN BY
posts 02, 06, 12, 14

DESTINATION 02

Webinar registration

Four webinars in the slate: AI Control Tower Playbook, AI governance, Agentic PLM, Agentforce workflow.

DRIVEN BY
posts 05, 07, 10, 11

DESTINATION 03

Gated downloads

Three downloads: AI-first operating model guide, Agentic Governance Checklist, Edge AI architecture brief.

DRIVEN BY
posts 08, 09, 15

DESTINATION 04

Sales contact

Direct routes to engineering, integration, IoT/edge specialists. Also the Week 1 anchor article and series follow.

DRIVEN BY
posts 01, 03, 04, 13

Five things to confirm before publish.

01

Anchor article gates the campaign.

Post 01 is the campaign anchor. Posts 02, 03, and 08 reference it. Ship Post 01 first; if it slips, every reference slips.

02

Case studies need real proof.

Posts 06 and 12 need real customer or pilot examples before design. If proof isn't ready, swap to a different format inside the same topic bucket.

03

Static slot used once, in Week 3.

Post 11 is the only static of the month — reserved for the webinar push. Don't spend it elsewhere.

04

Confirm four webinar dates.

AI Control Tower Playbook, AI governance, Agentic PLM, Agentforce workflow. All four must have confirmed dates before related posts ship.

05

No "learn more" CTAs. Every post lands somewhere.

All 15 posts route to one of four destinations: Readiness Assessment, webinar registration, gated download, or sales contact. If a post can't pick one, it doesn't ship.

June at a glance.
